This report does not cover areas such as, but not limited to, those that are enclosed or inaccessible, areas concealed by wall-coverings, floor coverings, furniture, equipment, stored articles, insulation or any portion of the structure in which inspection would necessitate removing or defacing any part of the structure.

Individuals licensed to perform pest control are not required, authorized or licensed to inspect or report for any fungi other than wood-destroying fungi, nor to report or comment on health or indoor air quality issues related to any fungi. Persons concerned about these issues should consult with a certified industrial hygienist or other person trained and qualified to render such opinions. **A wood-destroying organism (WDO) means an arthropod or plant life which damages and can reinfest seasoned wood in a structure, namely, termites, powder post beetles, old house borers, and wood-decaying fungi.**
